

In the Utah Wildlife Board meeting on Aug. 26, 2021, the board voted to postpone receiving public comments on the trail camera recommendations until further surveys could be conducted on the issue. The recommendations regarding trail cameras, the use of night-vision devices and various other big game proposals that were made public for feedback on Aug. 23 will be presented to the public in a future meeting.

If you have any questions, please contact Staci Coons at stacicoons@utah.gov.

Which best describes your position regarding the 2022 once-in-a-lifetime species recommendations?

Strongly disagree

Do you have any additional comments about the once-in-a-lifetime species recommendations?

All once in lifetime should be longer should have 60 to 90 days to hunt were it is once in lifetime
No helicopters survey before or during hunts this a joke and not fair to hunter to have you scattered them
You can due survey other 9 months of the year really suprising some has not sued you for wildlife harassment

Which best describes your position regarding the 2022 fishing recommendations?

Strongly agree
